

METAL PROGRESS

THE MAGAZINE OF MATERIALS AND PROCESS ENGINEERING

Volume 81
January 1962 through June 1962

ALLEN G. GRAY, *Editor*;
Editor, Periodical Publications, ASM

RALPH G. DERMOTT, *Managing Editor (On Leave, USNR)*

CARL R. WEYMUELLER
Associate Editor

JOSEPH E. FOSTER
Associate Editor

FRED L. SIEGRIST
Assistant Editor

ELIZABETH M. ALDRICH
Assistant Editor

FLOYD E. CRAIG, *Art Director*

Metal Progress Is Owned and Published by

THE AMERICAN SOCIETY FOR METALS
Metals Park, Ohio

Subject Index

The subject headings used in this index are chosen in accordance with the ASM-SLA Metallurgical Literature Classification, International (Revised) Edition, published by the American Society for Metals, 1958.

- Actinides**
The Elements Made by Man, by Glenn T. Seaborg (d) 4-142
- Aerospace applications**
Prospects for Use of Fibrous Metals, by J. H. Ross 4-93
- Age hardening**
How to Heat Treat Beryllium Copper, by Joseph B. Kuhn 6-86
Studies on High-Strength Aluminum Alloys in Australia, by I. J. Polmear 1-82
- Aircraft**
Studies on High-Strength Aluminum Alloys in Australia, by I. J. Polmear 1-82
A Superalloy for Medium Temperatures, by J. F. Barker 5-72
What Is Aircraft Quality? by H. A. Curwen (ep) 6-65
- Aluminum**
Anodic Coating on Aluminum Alloys, by G. W. Stickley (d) 2-160
Better Anodized Coatings on Aluminum, by C. C. Cohn and Harry Sosson (d) 4-174
Corrosion of Aluminum in Steam, by N. J. M. Wilkins and J. N. Wanklyn (d) 6-162
Metals and Processing Methods Used in the Mercury Spacecraft, by Stewart J. Stockett 6-68
Plating Anodized Aluminum, by H. J. Wittrock (d) 6-166
The Role of Ovens in Metal Processing, Staff Report 5-98
Straightening Aluminum Extrusions With Controlled Heat, by W. David Ashley 3-89
Studies on High-Strength Aluminum Alloys in Australia, by I. J. Polmear 1-82
Welded High-Strength Aluminum Alloys for Missiles (tn) 5-7
What Every Engineer Should Know About Stress Corrosion of Aluminum, by D. O. Sprowls and R. H. Brown 4-79; 5-77
- Anodic coating**
Anodic Coating on Aluminum Alloys, by G. W. Stickley (d) 2-160
- Anodized coatings**
Better Anodized Coatings on Aluminum, by C. C. Cohn and Harry Sosson (d) 4-174
- Anodizing, galvanic**
Welding Magnesium Parts for the Titan Missile, by Lyle Wallis 4-88
- Antifriction applications**
Graphite-Base Cermetts . . . a New Material for Bearing, Electrical and High-Temperature Applications, by Michael Humenik, Jr., D. W. Hall and R. L. Van Alsten 4-101
- Argon arc welding**
Welding Technology in the Soviet Union, by Richard Week 1-77
- Atmospheres**
Furnaces for High-Temperature Sintering, by Norbert K. Koebel 2-83
How Atmospheres Affect Creep-Rupture Behavior, by Robert Widmer and Nicholas J. Grant (d) 2-174
- Ausforming**
The Impact of Automotive Technology (ep) 3-65
- Automotive**
Determining Wear by Radioactive Techniques, by James J. Gumbelton (d) 4-158
Evaluating Leaf Springs for Automobiles, by Edgar Brooker 2-72
How the French Carbonitride Auto Parts, by J. Pomey and M. Moufard 1-65
The Impact of Automotive Technology (ep) 3-65
Galvanized Steel Joins Fight Against Auto Corrosion, by John C. Widman 3-66
From Here and There . . . Pearlitic malleable iron connecting rods (tn) 4-10
Steels and Cast Irons Used in Automotive Parts in Germany, by Hans U. Meyer 1-90
- (aa) Atomic Age; (br) Book Review; (c) Correspondence; (cp) Critical Points; (d) Digest;**
(ds) Data Sheet; (lm) Light Metallurgy; (sr) Short Runs; (tn) Technical News
- Welding Galvanized Steel in Automotive Applications, by John M. Diebold 3-72**
- Bainite formation**
Grain Size-Temperature-Rate of Bainite Formation, by J. Barford and W. S. Owen (d) 1-160
- Bearings**
Ball Bearings for 1200° F. Operation, by D. S. Wilson (d) 4-154
A Ceramic Bearing for High Temperature, by K. M. Taylor, L. B. Sibley and J. C. Lawrence (d) 6-174
Graphite-Base Cermetts . . . a New Material for Bearing, Electrical and High-Temperature Applications, by Michael Humenik, Jr., D. W. Hall and R. L. Van Alsten 4-101
- Beryllium**
Electrohydraulic Process Shapes Hard-to-Form Metals (tn) 1-9
Fine-Grain Be-Cu Alloys Produce Quality Castings (tn) 1-9
Metals and Processing Methods Used in the Mercury Spacecraft, by Stewart J. Stockett 6-68
New Developments Improve Ductility of Beryllium, by Richard Schmidt 2-78
Ni-Be Alloy Used in Forming and Extrusion Dies (tn) 3-7
Structural Forms Made From Beryllium Sheet (tn) 5-10
- Beryllium copper**
How to Heat Treat Beryllium Copper, by Joseph B. Kuhn 6-86
A New Technique for Bonding Beryllium Copper, by Robert C. Bertossa (d) 5-134
- Beryllium copper strip**
Unique Salt Bath Aids Heat Treatment of Strip, by E. M. Smith 3-83
- Beryllium plating**
Plating From Liquid Metal Solutions, by Frank Kerze, Jr. (c) 1-120
- Bessemer process, basic**
European Progress in Pneumatic Steel-making Methods, by Pierre Coeur 1-100
- Biography**
Carl E. Swartz 2-76
- Boiler tubes**
Hydrostatic and Hammer Testing of Pressure Vessels, by H. M. Wilton 5-84
- Brazing**
New Furnaces Braze Electronic Components (tn) 4-7
Precision Brazing of Large Components, by E. C. Buckingham (sr) 4-112
- Bright annealing**
Furnaces for High-Temperature Sintering, by Norbert K. Koebel 2-83
- Camshafts**
Steels and Cast Irons Used in Automotive Parts in Germany, by Hans U. Meyer 1-90
- Carbides**
Carbides in Steels, by R. W. Gurr, J. Christakos and L. S. Darken (d) 4-167
High-Temperature Materials in the Soviet Union, by J. H. Westbrook 2-97
- Carbonitriding**
How the French Carbonitride Auto Parts, by J. Pomey and M. Moufard 1-65
- Carburized case**
Characteristics of Carburized Cases, by O. W. McMullan 4-67
How Some Gears Fail, by R. Pederson and S. L. Rice (d) 5-186
- Carburizing, gas**
Steels and Cast Irons Used in Automotive Parts in Germany, by Hans U. Meyer 1-90
- Casting, semicontinuous**
Semicontinuous Casting of Steel Ingots, by H. W. Balster 3-85
- Castings**
Carbon-Bonded Zircon Molds Make Smooth Surface Castings (tn) 1-9
Factors in Selecting Carbon and Low-Alloy Steel Castings, Staff Report 2-94
- Fine-Grain Be-Cu Alloys Produce Quality Castings (tn) 1-9**
- Hot Tearing in Castings, by A. M. Lyass and Chou Yao-Huo (d) 1-175**
- How Internal Shrinkage Affects Steel Castings (tn) 4-9**
- Properties and Applications of Carbon and Low-Alloy Steel Castings (ds) 2-96B**
- A Superalloy for Medium Temperatures, by J. F. Barker 5-72**
- Trends in Use of Steel Castings in the United Kingdom and Europe, by A. H. Sully 1-95**
- Two-Layered Shell Molds—a Russian Casting Technique, by A. A. Smirnov and I. V. Bobysheva (d) 4-157**
- Cast iron**
A New Concept of Cast Iron Metallurgy, by Harish D. Merchant 5-90
Steels and Cast Irons Used in Automotive Parts in Germany, by Hans U. Meyer 1-90
- Cathodic protection**
Protecting Pipelines From Corrosion, by L. A. Woodworth and F. P. A. Robinson (d) 5-160
- Centrifugal casting**
Metallurgical Research in Canada, by J. Gordon Parr 1-104
- Ceramics**
A Ceramic Bearing for High Temperatures, by K. M. Taylor, L. B. Sibley and J. C. Lawrence (d) 6-174
Glasses and Ceramics for the Engineer, by J. R. Blizard (d) 4-161
Metallurgical Research in Canada, by J. Gordon Parr 1-104
- Cermets**
Friction at High Temperatures, by R. D. Brown, R. A. Burton and P. M. Ku (d) 4-168
- Cermets, graphite-base**
Graphite-Base Cermetts . . . a New Material for Bearing, Electrical and High-Temperature Applications, by Michael Humenik, Jr., D. W. Hall and R. L. Van Alsten 4-101
- Cermets, titanium-carbide**
Ball Bearings for 1200°F. Operation, by D. S. Wilson (d) 4-154
- Cesium**
Extracting Cesium-137 From Nuclear Wastes (tn) 5-10
Space Ships Use Porous Tungsten Parts, by Neal T. Saunders (d) 5-144
- Chromium, electroplated**
Characteristics of Electroplated Chromium, by C. P. Brittain and G. C. Smith (d) 5-184
- Cleaning solutions**
A Safe Cleaner for Austenitic Stainless Steel, by A. W. Dana, Jr. 4-86
- Coating, anodic**
Anodic Coating on Aluminum Alloys, by G. W. Stickley (d) 2-160
- Coating, antioxidant**
Metals and Processing Methods Used in the Mercury Spacecraft, by Stewart J. Stockett 6-68
- Coating, continuous strip**
The Role of Ovens in Metal Processing, Staff Report 5-98
- Coating powders with metal**
Powder Metallurgy in the Nuclear Age, by Tom Bishop (d) 2-136
- Coatings**
Better Anodized Coatings on Aluminum, by C. C. Cohn and Harry Sosson (d) 4-174
Coatings Resist Oxidation of Refractory Metals (tn) 4-9
Galvanized Steel Joins Fight Against Auto Corrosion, by John C. Widman 3-66
Ni-O Coatings Vary in Corrosion Resistance, A. H. DuRose (d) 6-166
Resistance Welding of Electronic Components, by Joseph C. Heindl, Joseph N. Alberts and Bert D. Brock 6-97

The Role of Oxide and Replacement Coating, in Metal Finishing, Part I — Ferrous Alloys, by Lawrence J. Durney	6-92
Coatings, metallic	
Metallurgical Research in Canada, by J. Gordon Parr	1-104
Cobalt-base alloy bearings	
Ball Bearings for 1200°F. Operation, by D. S. Wilson (d)	4-154
Cobalt plating	
Plating From Liquid Metal Solutions, by Frank Kerze, Jr. (c)	1-120
Columbium	
Electrohydraulic Process Shapes Hard-to-Form Metals (tn)	1-9
New Family of Columbium Alloys for Spacecraft (tn)	1-9
Protecting Columbium With Zinc, by B. F. Brown et al (d)	3-172
Steels for Nuclear Power Plants in Britain, by Tom Bishop	4-97
What Electrode to Use for Welding Type 347 Stainless (tn)	1-7
Composite powders	
Composite Powders Form More Uniform Compacts, by J. A. Lund, T. Krantz and V. N. Mackiw (d)	5-190
Powder Metallurgy in Austria, by Henry H. Haasner	6-102
Connecting rods	
From Here and There . . . Pearlitic malleable iron (tn)	4-10
Constructional steels	
High-Strength Steels in Japan, by Tsunemi Matsuda	1-68
Continuous tube mill	
Tube To Be Produced in Continuous Mill (tn)	5-9
Conversion coatings	
The Role of Oxide and Replacement Coatings in Metal Finishing, Part I — Ferrous Alloys, by Lawrence J. Durney	6-92
CO₂ welding	
Welding Technology in the Soviet Union, by Richard Week	1-77
Copper-base alloys	
Protecting Alloy Samples From Oxidation During Heat Treatment, by Herbert Fischer (c)	6-114
Copper powders	
Sintering Copper and Oxide Powders, by Ye. M. Savitskii and A. I. Vlasov (d)	5-193
Cored induction furnace	
An Italian Induction Furnace for Gray Iron, by Aldo Tagliaferri and Elton E. Staples	1-85
Corrosion	
Corrosion, Internationally Speaking, by Arthur B. Teasen (d)	1-142
Galvanized Steel Joins Fight Against Auto Corrosion, by John C. Widmer	3-66
Metallurgical Research in Canada, by J. Gordon Parr	1-104
Corrosion protection	
Protecting Pipelines From Corrosion, by L. A. Woodworth and F. P. A. Robinson (d)	5-160
Welding Magnesium Parts for the Titan Missile, by Lyle Wallis	4-88
Corrosion resistance	
Better Anodized Coatings on Aluminum, by C. C. Cohn and Harry Sosson (d)	4-174
Corrosion Resistance of an Electroless Nickel Lining in Tank Applications, by Harold M. Coleman	4-109
Galvanizing Offers Economical Protection for Steel (tn)	3-7
The Role of Oxide and Replacement Coatings in Metal Finishing, Part I — Ferrous Alloys, by Lawrence J. Durney	6-92
Stress in Electroplated Metals, by Joseph B. Kushner	2-88
Creep	
Creep in Helical Springs, by C. T. Eakin	2-102
Creep forming	
Metals and Processing Methods Used in the Mercury Spacecraft, by Stewart J. Stockett	6-68
Creep-resisting steels	
Steels for Nuclear Power Plants in Britain, by Tom Bishop	4-97
Creep-rupture behavior	
How Atmospheres Affect Creep-Rupture Behavior, by Robert Widmer and Nicholas J. Grant (d)	2-174
Crip strength	
Magnesium Alloys for Nuclear Use, by G. C. E. Olds and G. M. Michie (d)	5-190
Crimping or bending wire	
A Guide for the Crimping or Bending of Wire, by John M. Kiefer	5-95
Cryogenic tanks	
Sheet for Cryogenic Tanks, by G. B. Espey, M. H. Jones and W. F. Brown, Jr. (d)	5-159
Cyclotron	
Precision Brazing of Large Components, by E. C. Buckingham (sr)	4-112
Cylinder heads	
Steels and Cast Irons Used in Automotive Parts in Germany, by Hans U. Meyer	1-90
Decarburizing steel	
Decarburizing Low-Carbon Steel for Porcelain Enameling Properties, by D. J. Blickwede (d)	4-152
Degassing	
Making Steel by the D-H Vacuum Process, by Charles D. Preusch	6-80
Denitriding steel	
Denitriding in a Vacuum (tn)	1-8
Descaling steel wire	
Descaling Steel Wire More Rapidly, by A. B. Dove (d)	4-138
Diaphragm, vibrating	
A Low-Alloy Steel for Vibrating Diaphragms, by J. C. Thompson	3-97
Dichromate treatment	
Welding Magnesium Parts for the Titan Missile, by Lyle Wallis	4-88
Diffusion bonding beryllium copper	
A New Technique for Bonding Beryllium Copper, by Robert C. Bertossa (d)	5-134
Dimensional stability	
Characteristics of Carburized Cases, by G. W. McMullan	4-67
Dislocation theory of stress initiation	
Stress in Electroplated Metals, by Joseph B. Kushner	2-88
Dortmund-Hoerder process	
Making Steel by the D-H Vacuum Process, by Charles D. Preusch	6-80
Ductile tungsten	
More on Ductile Tungsten, by William H. Lens (e)	4-118
Duplex nickel plating	
Stress in Electroplated Metals, by Joseph B. Kushner	2-88
Education	
Are You Becoming Obsolete?, by Robert T. Hook (e)	2-114
Statistics on Metallurgical Education, by Morris E. Nicholson	2-107
Electrical applications	
Graphite-Based Cermetts . . . a New Material for Bearing, Electrical and High-Temperature Applications, by Michael Humenik, Jr., D. W. Hall and R. L. Van Alsten	4-101
Electrical energy	
Direct Generation of Electricity, by B. C. Lindley (d)	5-178
Electrodes	
Consumable Electrodes Made by Flash and Upset Welding (tn)	5-8
High-Strength Steels in Japan, by Tsunemi Matsuda	1-68
What Electrode to Use for Welding Type 347 Stainless (tn)	1-7
Electrohydraulic forming	
Electrohydraulic Process Shapes Hard-to-Form Metals (tn)	1-9
New Ideas in Metal Forming (tn)	2-9
Electroless nickel lining	
Corrosion Resistance of an Electroless Nickel Lining in Tank Applications, by Harold M. Coleman	4-109
Electrolytic etching and polishing	
A New Polishing Concept From East Germany, by Franz Raemmel and Kurt Veit	1-109
Electron beam welding	
A Discussion of Electron Beam Welding, by E. C. Miller (d)	5-154
Electron beam machining	
Machining With the Electron Beam, by Wolfgang Optiz (d)	2-170
Electron microprobe analyzer	
Principles and Uses of the Electron Microprobe Analyzer, by David W. Levinson	3-92
Electron microscopy	
Growth Structures in Thin Tungsten Films, by Gordon D. Barnett, Arnold Miller and Jack I. Medoff	4-75
What's New in Electron Microscopy, by Elizabeth P. Hartner (d)	5-150
Electronic components	
New Furnaces Braze Electronic Components (tn)	4-7
Resistance Welding of Electronic Components, by Joseph C. Heindl, Joseph N. Alberts and Bert D. Brock	6-97
Electroplated metals	
Stress in Electroplated Metals, by Joseph B. Kushner	2-88
Electric slag process	
High-Temperature Materials in the Soviet Union, by J. H. Westbrook	2-97
Electric slag welding	
Welding Technology in the Soviet Union, by Richard Week	1-77
Elgiloy fibers	
Prospects for Use of Fibrous Metals, by J. H. Ross	4-95
Elongation of steel	
How Specimen Geometry Affects Elongation, by Eric B. Kula and Norbert H. Fahey (d)	5-180
Embrittlement	
What Electrode to Use of Welding Type 347 Stainless (tn)	1-7
Endurance limit	
How Inclusions Affect Fatigue in Steels, by M. Atkinson (d)	4-165
Engine wear	
Determining Wear by Radioactive Techniques, by James J. Gumbleton (d)	4-158
Epoxy resin	
Plastics Used in Automotive Tooling (tn)	5-8
Etching, cathodic	
Remote Mounting of Specimens, by W. H. Leith (sr)	2-111
Etching, electrolytic	
A New Polishing Concept From East Germany, by Franz Raemmel and Kurt Veit	1-109
Eutectic cells	
A New Concept of Cast Iron Metallurgy, by Harish D. Merchant	5-90
Extrusion dies	
Ni-Be Alloy Used in Forming and Extrusion Dies (tn)	3-7
Extrusions, aluminum	
Straightening Aluminum Extrusions With Controlled Heat, by W. David Ashley	3-89
Fabrication	
Fabricating Fuel Elements for a Gas-Cooled Nuclear Reactor, by C. W. Funk and T. L. Gregory	3-78
Metals and Processing Methods Used in the Mercury Spacecraft, by Stewart J. Stockett	6-68
Fatigue behavior	
Studies on High-Strength Aluminum Alloys in Australia, by I. J. Polmar	1-82
Fatigue resistance	
How Inclusions Affect Fatigue in Steels, by M. Atkinson (d)	4-165
Fatigue testing	
Evaluating Leaf Springs for Automobiles, by Edgar Brooker	2-72
Fiber metallurgy	
What Every Engineer Should Know About Reinforced Plastics, Part I — Properties and Processes, Staff Report	6-106
Fibrous metals	
Prospects for Use of Fibrous Metals, by J. H. Ross	4-93

(aa) Atomic Age; (br) Book Review; (c) Correspondence; (cp) Critical Points; (d) Digest; (ds) Data Sheet; (lm) Light Metallurgy; (sr) Short Runs; (tn) Technical News

Finishing	
The Role of Oxide and Replacement Coatings in Metal Finishing, Part I—Ferrous Alloys, by Lawrence J. Durney	6-92
Flash welding	
Consumable Electrodes Made by Flash and Upset Welding (tn)	5-8
Welding Technology in the Soviet Union, by Richard Week	1-77
Fluid bed	
British Use Fluid Bed for Thermal Fatigue Studies, by Tom Bishop (sr)	1-116
Coatings Resist Oxidation of Refractory Metals (tn)	4-9
Fluidized Reduction of Iron Ores (tn)	5-9
Forming, high-energy	
Electrohydraulic Process Shapes Hard-to-Form Metals (tn)	1-9
Foundry practice	
Carbon-Bonded Zircon Molds Make Smooth Surface Castings (tn)	1-9
Metalurgical Research in Canada, by J. Gordon Parr	1-104
Trends in Use of Steel Castings in the United Kingdom and Europe, by A. H. Sully	1-95
Two-Layer Shell Molds—a Russian Casting Technique, by A. A. Smirnov and I. V. Bobysheva (d)	4-157
Fracture toughness	
More on Fracture Toughness, by Harold Bernstein (c)	3-114
More on Fracture Toughness, by George K. Manning (c)	3-116
Friction	
Friction at High Temperatures, by R. D. Brown, R. A. Burton and P. M. Ku (d)	4-168
Graphite-Base Cermets... a New Material for Bearing, Electrical and High-Temperature Applications, by Michael Humenik, Jr., D. W. Hall and R. L. Van Alsten	4-101
Friction welding	
Welding Technology in the Soviet Union, by Richard Week	1-77
Fuels, nuclear	
English Can Nuclear Fuels With Stainless Steel (tn)	4-8
Fabricating Fuel Elements for a Gas-Cooled Nuclear Reactor, by C. W. Funk and T. L. Gregory	3-78
Furnaces	
Brown Bovery Furnaces Installed (tn)	5-10
Furnaces for High-Temperature Sintering, by Norbert K. Koebel	2-83
How to Heat Treat Beryllium Copper, by Joseph B. Kuhn	6-86
An Italian Induction Furnace for Gray Iron, by Aldo Tagliaferri and Elton E. Staples	1-85
A Microscope for Ultrahigh Temperatures, by D. M. Olson, B. B. Brixner and M. C. Smith	6-75
Powder Metallurgy in Austria, by Henry H. Haasner	6-102
Furnace, brazing	
New Furnaces Braze Electronic Components (tn)	4-7
Furnace, fluidized bed	
Coatings Resist Oxidation of Refractory Metals (tn)	4-9
Furnace, salt bath	
Unique Salt Bath Aids Heat Treatment of Strip, by E. M. Smith	3-83
Galvanized steel	
Galvanized Steel Joins Fight Against Auto Corrosion, by John C. Whitman	3-66
Galvanizing Offers Economical Protection for Steel (tn)	3-7
Prepainting Extends the Service Life of Galvanized Structures, by E. A. Anderson	5-86
Galvanizing, continuous	
Continuous Galvanizing, Staff Report	3-76
The Role of Ovens in Metal Processing, Staff Report	5-98
Gas-cooled nuclear reactor	
Fabricating Fuel Elements for a Gas-Cooled Nuclear Reactor, by C. W. Funk and T. L. Gregory	3-78
Steels for Nuclear Power Plants in Britain, by Tom Bishop	4-97
Gas turbine engines	
A Superalloy for Medium Temperatures, by J. F. Barker	5-72
(aa) Atomic Age; (br) Book Review; (c) Correspondence; (cp) Critical Points; (d) Digest; (da) Data Sheet; (lm) Light Metallurgy; (sr) Short Runs; (tn) Technical News	
With Controlled Heat, by W. David Ashley	3-89
Helical springs	
Creep in Helical Springs, by C. T. Eakin	2-102
Helium	
A Microscope for Ultrahigh Temperatures, by D. M. Olson, B. B. Brixner and M. C. Smith	6-75
High-energy-rate forging	
High-Energy-Rate Forging Press Cuts Production Costs (tn)	2-7
High-strength aluminum alloys	
Studies on High-Strength Aluminum Alloys in Australia, by I. J. Polmar	1-82
High-strength steel	
AISC Specification Recognizes High-Strength Steels (tn)	2-7
High-Strength Steels in Japan, by Tsunemi Matsuda	1-68
Steels for Nuclear Power Plants in Britain, by Tom Bishop	4-97
High-temperature applications	
Graphite-Based Cermetts... a New Material for Bearing, Electrical and High-Temperature Applications, by Michael Humenik, Jr., D. W. Hall and R. L. Van Alsten	4-101
High-temperature materials	
Glasses and Ceramics for the Engineer, by J. R. Blizard (d)	4-161
High-Temperature Materials in the Soviet Union, by J. H. Westbrook	2-97
High-temperature sintering	
Furnaces for High-Temperature Sintering, by Norbert K. Koebel	2-83
Hot oil quench	
Impressions of European Metallurgical Practices, by Walter E. Jominy	1-114
Hot sizing	
Metals and Processing Methods Used in the Mercury Spacecraft, by Stewart J. Stockett	6-68
Hot tearing	
Hot Tearing in Castings, by A. M. Lyass and Chou Yao-Huo (d)	1-175
Hydrogen brazing	
New Furnaces Braze Electronic Components (tn)	4-7
Hydrogen theory of stress initiation	
Stress in Electropolished Metals, by Joseph B. Kushner	2-88
Hydrostatic testing	
Hydrostatic and Hammer Testing of Pressure Vessels, by H. M. Wilten	5-84
Inclusions	
How Inclusions Affect Fatigue in Steels, by M. Atkinson (d)	4-165
Refractories Cause Few Inclusions in Stainless Steels, by D. C. McCarter, S. Ramachandran and J. C. Fulton (d)	2-154
Principles and Uses of the Electron Microprobe Analyzer, by David W. Levinson	3-92
Inconel	
Creep in Helical Springs, by C. T. Eakin	2-102
Induction furnace	
An Italian Induction Furnace for Gray Iron, by Aldo Tagliaferri and Elton E. Staples	1-85
Powder Metallurgy in Austria, by Henry H. Haasner	6-102
Ingots, steel	
Semicontinuous Casting of Steel Ingots, by H. W. Balster	3-85
Insulation, thermal	
Metals and Processing Methods Used in the Mercury Spacecraft, by Stewart J. Stockett	6-68
Intermetallics	
High-Temperature Materials in the Soviet Union, by J. H. Westbrook	2-97
Ion propulsion	
Space Ships Use Porous Tungsten Parts, by Neal T. Saunders (d)	5-144
Iron ore	
Fluidized Reduction of Iron Ores (tn)	5-9
A New Iron Ore Recovery Process, by W. A. Mudge	3-108
New Sources for Iron Ore, by E. H. Rose (d)	2-156

Irradiated metal	
Remote Mounting of Specimens, by W. H. Leith (<i>sr</i>)	2-111
Irradiation effects	
Steels for Nuclear Power Plants in Britain, by Tom Bishop	4-97
Kaldo process	
European Progress in Pneumatic Steel-making Methods, by Pierre Coheur	1-100
LD process	
European Progress in Pneumatic Steel-making Methods, by Pierre Coheur	1-100
Linear accelerator	
The Linear Accelerator . . . a New Tool for Radiography, Staff Report	3-107
Lithium	
Plating From Liquid Metal Solutions, by Frank Kerze, Jr. (<i>c</i>)	1-120
Lubricants	
Ball Bearings for 1200°F. Operation, by D. S. Wilson (<i>d</i>)	4-154
Friction at High Temperatures, by R. D. Brown, R. A. Burton and P. M. Ku (<i>d</i>)	4-168
Molybdenum Disulfide—New Type of Lubricant, by Kenneth B. Wood, Jr. (<i>d</i>)	5-140
Machining	
Machining With the Electron Beam, by Wolfgang Optitz (<i>d</i>)	2-170
Magnesium alloys	
From Here and There . . . Corrosion (<i>tn</i>)	1-10
Magnesium Alloys for Nuclear Use, by G. C. E. Olds and G. M. Michie (<i>d</i>)	5-190
Welding Magnesium Parts for the Titan Missile, by Lyle Wallis	4-88
Magnetic hammer forming of metals	
New Ideas in Metal Forming (<i>tn</i>)	2-9
Magnetic-particle inspection	
What Is Aircraft Quality?, by H. A. Curwen (<i>cp</i>)	6-65
Manned spacecraft	
New Family of Columbium Alloys for Spacecraft (<i>tn</i>)	1-9
Maraging steels	
Interest Grows in High-Nickel Steels (<i>tn</i>)	4-7
Materials engineering	
The Responsibilities of Materials Engineering, by Alfred H. Petersen (<i>cp</i>)	5-65
Metal coating of powders	
Powder Metallurgy in the Nuclear Age, by Tom Bishop (<i>d</i>)	2-136
Metal-fiber technology	
Prospects for Use of Fibrous Metals, by J. H. Ross	4-93
Metal finishing	
The Role of Oxide and Replacement Coatings in Metal Finishing, Part I — Ferrous Alloys, by Lawrence J. Durney	6-92
Metallic cloths	
Prospects for Use of Fibrous Metals, by J. H. Ross	4-93
Metallography	
A Microscope for Ultrahigh Temperatures, by D. M. Olson, B. B. Brixner and M. C. Smith	6-75
A New Polishing Concept From East Germany, by Franz Raemmel and Kurt Velt	1-109
Preparing Various Graphites for Metallographic Examination, by Theresa V. Brassard and Andrew S. Holik	5-109
Preservation of Edge Detail in Metallography, by W. D. Hayes, N. J. Tighe and H. B. Kirkpatrick (<i>sr</i>)	3-112
A Rapid Method for Polishing Pyrolytic Graphite, by William C. Coons	6-83
Remote Mounting of Specimens, by W. H. Leith (<i>sr</i>)	2-111
Specimen Holders for Remote Metallography, by W. N. Posey and Gretchen B. Alewine (<i>sr</i>)	6-112
What's New in Electron Microscopy, by Elizabeth P. Hartner (<i>d</i>)	3-150
Microprobe analyzer	
Principles and Uses of the Electron Microprobe Analyzer, by David W. Levinson	3-92
Microscopic examination	
A Rapid Method for Polishing Pyrolytic Graphite, by William C. Coons	6-83
Microscopy	
Growth Structures in Thin Tungsten Films, by Gordon D. Barnett, Arnold Miller and Jack I. Medoff	4-75
A Microscope for Ultrahigh Temperatures, by D. M. Olson, B. B. Brixner and M. C. Smith	6-75
What's New in Electron Microscopy, by Elizabeth P. Hartner (<i>d</i>)	3-150
Microstructure of pyrolytic graphite	
Preparing Various Graphites for Metallographic Examination, by Theresa V. Brassard and Andrew S. Holik	5-109
Pyrolytic Graphites . . . How Structure Affects Properties, by R. J. Diefendorf and E. R. Stover	5-103
Milling	
Machining With the Electron Beam, by Wolfgang Optitz (<i>d</i>)	2-170
Missiles	
From Here and There . . . Titanium pressure vessels for . . . (<i>tn</i>)	1-10
Resistance Welding of Electronic Components, by Joseph C. Heindl, Joseph N. Alberts and Bert D. Brock	6-97
Welded High-Strength Aluminum Alloys for Missiles (<i>tn</i>)	5-7
Welding Magnesium Parts for the Titan Missile, by Lyle Wallis	4-88
Molding plastics	
What Every Engineer Should Know About Reinforced Plastics, Part 1 — Properties and Processes, Staff Report	6-106
Molds, flexible	
Materials Progress in Nonmetallics (<i>tn</i>)	2-9
Molybdenum plating	
Plating From Liquid Metal Solutions, by Frank Kerze, Jr. (<i>c</i>)	1-120
Music wire	
Creep in Helical Springs, by C. T. Eakin	2-102
Neutron irradiation	
Steels for Nuclear Power Plants in Britain, by Tom Bishop	4-97
Nickel alloys	
How Atmospheres Affect Creep-Rupture Behavior, by Robert Widmer and Nicholas J. Grant (<i>d</i>)	2-174
Ni-Be Alloy Used in Forming and Extrusion Dies (<i>tn</i>)	3-7
Nickel lining, electroless	
Corrosion Resistance of an Electroless Nickel Lining in Tank Applications, by Harold M. Coleman	4-109
Nickel plating, duplex	
Stress in Electropolated Metals, by Joseph B. Kushner	2-88
Nitriding, liquid	
Steel and Cast Irons Used in Automotive Parts in Germany, by Hans U. Meyer	1-90
Nitrogen as coolant	
Fabricating Fuel Elements for a Gas-Cooled Nuclear Reactor, by C. W. Funk and T. L. Gregory	3-78
Nondestructive testing	
The Linear Accelerator . . . a New Tool for Radiography, Staff Report	3-107
Radiography . . . Its Purposes and Practices, by R. C. Barry	3-100
What's New in Nondestructive Testing?, by Warren J. McGonnagle (<i>d</i>)	6-188
Nonferrous metals, welding of	
Welding Technology in the Soviet Union, by Richard Weck	1-77
Nonmetallic inclusions	
Principles and Uses of the Electron Microprobe Analyzer, by David W. Levinson	3-92
What Is Aircraft Quality?, by H. A. Curwen (<i>cp</i>)	6-65
Nonmetallic materials	
Preparing Various Graphites for Metallographic Examination, by Theresa V. Brassard and Andrew S. Holik	5-109
Pyrolytic Graphites . . . How Structure Affects Properties, by R. J. Diefendorf and E. R. Stover	5-103
Notch sensitivity	
Notch Strength in Sheet, by Volker Weiss and John G. Sessler (<i>d</i>)	4-176
Nuclear fuels	
English Can Nuclear Fuels With Stainless Steel (<i>tn</i>)	4-8
Nuclear-powered spacecraft	
New Family of Columbium Alloys for Spacecraft (<i>tn</i>)	1-9
Nuclear reactor	
Fabricating Fuel Elements for a Gas-Cooled Nuclear Reactor, by C. W. Funk and T. L. Gregory	3-78
Magnesium Alloys for Nuclear Use, by G. C. E. Olds and G. M. Michie (<i>d</i>)	5-190
More on Dresden Nuclear Power Reactor (<i>tn</i>)	5-7
Steels for Nuclear Power Plants in Britain, by Tom Bishop	4-97
Nuclear wastes	
Extracting Cesium-137 From Nuclear Wastes (<i>tn</i>)	5-10
Nylon	
Prospects for Use of Fibrous Metals, by J. H. Ross	4-93
Nylon, east	
Progress in Plastic Materials (<i>tn</i>)	4-10
OLP process for steelmaking	
European Progress in Pneumatic Steel-making Methods, by Pierre Coheur	1-100
Ore, iron	
A New Iron Ore Recovery Process, by W. A. Mudge	3-108
New Sources for Iron Ore, by E. H. Rose (<i>d</i>)	2-156
Osmium	
Powder Metallurgy in Austria, by Henry H. Hausner	6-102
Ovens	
The Role of Ovens in Metal Processing, Staff Report	5-98
Oxidation	
Coatings Resist Oxidation of Refractory Metals (<i>tn</i>)	4-9
Oxygen-vapor (O-V) process for steelmaking	
European Progress in Pneumatic Steel-making Methods, by Pierre Coheur	1-100
Parachutes	
Prospects for Use of Fibrous Metals, by J. H. Ross	4-93
Pelletizing	
A New Iron Ore Recovery Process, by W. A. Mudge	3-108
Phase identification	
Principles and Uses of the Electron Microprobe Analyzer, by David W. Levinson	3-92
Phoenix-Lance process for steelmaking	
European Progress in Pneumatic Steel-making Methods, by Pierre Coheur	1-100
Phosphor bronze strip	
Unique Salt Bath Aids Heat Treatment of Strip, by E. M. Smith	3-83
Pickle liquors	
Zirconium Siphon for Pickle Liquors (<i>tn</i>)	1-8
Pickling	
Descaling Steel Wire More Rapidly, by A. B. Dove (<i>d</i>)	4-138
Metals and Processing Methods Used in the Mercury Spacecraft, by Stewart J. Stockett	6-88
Pipelines	
Protecting Pipelines From Corrosion, by L. A. Woodworth and F. P. A. Robinson (<i>d</i>)	5-160
Pipe production	
Tube To Be Produced in Continuous Mill (<i>tn</i>)	5-9
Piston rings	
Piston Rings of Sintered Iron, by M. S. Robinson (<i>c</i>)	2-114
Plastics	
Plastics Used in Automotive Tooling (<i>tn</i>)	5-8
Progress in Plastic Materials (<i>tn</i>)	4-10
What Every Engineer Should Know About Reinforced Plastics, Part 1 — Properties and Processes, Staff Report	6-106
Plastic coatings for steel	
Galvanized Steel Joins Fight Against Auto Corrosion, by John C. Widman	3-86

METAL PROGRESS

THE MAGAZINE OF MATERIALS AND PROCESS ENGINEERING

Volume 82
July 1962 through December 1962

ALLEN G. GRAY, *Editor*;
Editor, Periodical Publications, ASM

RALPH G. DERMOTT, *Managing Editor*

CARL R. WEYMUELLER
Associate Editor

FRED L. SIEGRIST
Associate Editor

ELIZABETH M. ALDRICH
Assistant Editor

FLOYD E. CRAIG
Art Director

Metal Progress Is Owned and Published by

THE AMERICAN SOCIETY FOR METALS
Metals Park, Ohio

Subject Index

The subject headings used in this index are chosen in accordance with the ASM-SLA Metallurgical Literature Classification, International (Revised) Edition, published by the American Society for Metals, 1958.

Adhesives	
Strong Epoxy Adhesives Cure at Room Temperature (<i>tn</i>)	5-10
Agricultural equipment	
Ductile Iron Castings in Farm Equipment, by Albert H. Rauch and Eric Welander	4-92
Aircraft	
Investment Castings for Advanced Aircraft, by R. J. Wilcox and R. W. Martini	3-80
NASA Program Screens Alloys for Mach-2 Transport (<i>tn</i>)	2-8
Alloy steel	
Engineering Properties of Ausformed Steels, by William M. Justusson and Victor F. Zackay	6-111
Heat Treating Large Parts to Close Tolerances, by Jack D. Robinson and John C. Weis, Jr.	4-96
Melting Alloys by the Hopkins Process, by W. A. McKeen, L. G. Joseph and D. M. Spehar	3-86
New Steel Designed for Storing Gases at -75° F. (<i>tn</i>)	5-9
Aluminum	
Fatigue Strength Is Increased by Coating With Aluminum (<i>tn</i>)	2-9
Aluminum, extrusion	
Extruding Aluminum Sheaths on Cables, by Fred F. Polizano	1-80
Aluminum alloys	
Aluminum Alloy Sheet Heat Treated on Continuous Line (<i>tn</i>)	5-9
How Intermetallics Affect Aluminum Alloys, by Larry H. Glassman and Arthur J. McEvily, Jr. (<i>d</i>)	3-158
How to Do More With Wrought Aluminum Alloys, by Fred L. Siegrist	4-124
Properties and Applications of Wrought Aluminum Alloys (<i>ds</i>)	4-128B
Selection of Aluminum, Magnesium and Zinc Alloys, by Robert Metzger	3-78
Aluminum alloys, welding	
New Weldable Aluminum Alloy Exhibits High Strength (<i>tn</i>)	4-9
Aluminum castings	
What Metallurgical Engineering Can Do for Management, by Robert F. Thompson and George H. Robinson	3-66
Annealing	
British Study New Method for Annealing Strip, by Tom Bishop	2-93
Controlling Furnace Atmospheres by Infrared Analysis, by J. H. Flood	5-76
Arc cutting	
Plasma Torch Cuts Metal at Rapid Rate (<i>tn</i>)	6-8
Atomic energy	
The New World, by Allen G. Gray (<i>cp</i>)	6-65
Ausforming	
Engineering Properties of Ausformed Steels, by William M. Justusson and Victor F. Zackay	6-111
Automobiles	
Forming Auto Parts of Galvanized Steel, by Paul G. Nelson	4-104
Selection of Aluminum, Magnesium and Zinc Alloys, by Robert Metzger	3-78
Selection of Materials for Automotive Applications, by J. R. Forrester	2-97
Selection of Steel for Economy in Manufacture, by Stuart M. Hansen	3-74
Specialty Metals for Automotive Use, by R. E. Harvie	3-80
Bearings	
Dry Bearings Operate Under Extreme Conditions (<i>tn</i>)	4-7
Beryllium	
Vacuum Brazing of Stainless Steel to Beryllium, by Everett M. Whitson	1-93
Beryllium, powder metal compacts	
Fine, Low-Oxygen Powders May Be Key to Ductile Beryllium (<i>tn</i>)	5-8
Internal Structures of Rolled, Pressed and Extruded Beryllium Compacts, by B. B. Mudii (<i>d</i>)	1-140
Beryllium alloys	
Nuclear Rockets and Ramjets Challenge Today's Materials	3-105
Blast furnace	
Blast Furnace Tests Prove Computer Predictions (<i>tn</i>)	1-9
Blasting	
Residual Stresses and Abrasive Blasting, by H. J. Noble (<i>d</i>)	2-168
Boron	
Impregnating Steels With Boron, by V. D. Taras and L. V. Skoogorova (<i>d</i>)	2-166
Brazing	
Brazing and Hardening Stainless Steels in Vacuum, by Richard P. Korff	5-80
Vacuum Brazing of Stainless Steel to Beryllium, by Everett M. Whitson	1-93
Cable sheath	
Extruding Aluminum Sheaths on Cables, by Fred F. Polizano	1-80
Carbides, in steel	
How Sensitization Affects the Corrosion of Stainless Weld Metal, by Russell B. Gunia and Thomas J. Moore (<i>ds</i>)	5-96B
Sensitization of Stainless Weld Metal, by Russell B. Gunia and Thomas J. Moore	5-96
Carbon	
How Carbon Affects a 5% Chromium Tool Steel, by John C. Hamaker, Jr. and Eugene J. Vater (<i>d</i>)	2-138
How Carbon Can Affect Notch Strength, by E. P. Klier (<i>d</i>)	1-134
Carbon steel	
Induction Hardening System Improves Crankshafts (<i>tn</i>)	6-7
What Columbium Does to Carbon Steel, by F. E. Van Voris	2-84
Carburizing	
Compression Blocks Solve Gearing Problems, by Russell Hoffman and Lynn E. Arnold	6-79
Cast iron	
Alloyed Cast Iron, by E. E. Farafanov and L. P. Gorushina (<i>d</i>)	2-162
Integrally Cast Shaft Cuts Sewing Machine Costs (<i>tn</i>)	5-9
Cast iron, malleable	
How Impact Resistant is Malleable Iron? by W. K. Bock and Hans J. Heine	3-83
Pearlitic Malleable Connecting Rod Wins Design Contest (<i>tn</i>)	6-9
Cast iron, nodular	
ASTM Sets Standard for Austenitic Nodular Iron (<i>tn</i>)	5-8
Ductile Iron Castings in Farm Equipment, by Albert H. Rauch and Eric Welander	4-92
Casting, investment	
Fluidized Bed for Investment Molds (<i>tn</i>)	1-10
Hot Work Dies Are Cast to Shape (<i>tn</i>)	3-9
Investment Castings for Advanced Aircraft, by R. J. Wilcox and R. W. Martini	5-90
Semicontinuous Vacuum System Casts Superalloy Parts (<i>tn</i>)	5-8
Stainless Steel Investment Cast Without Pitting (<i>tn</i>)	3-7
Casting, semicontinuous	
Semicontinuous Casting of Steel Ingots by R. D. Whetstone (<i>c</i>)	5-120
Semicontinuous Vacuum System Casts Superalloy Parts (<i>tn</i>)	5-8
Castings	
Fractures in Castings, by J. A. Wright and A. G. Quarrell (<i>d</i>)	3-164
Problems in Designing Castings With Thin Sections	5-84
Properties of a Cast Stainless, by R. J. Mangone and A. M. Hall (<i>d</i>)	2-173
Selection of Materials for Automotive Applications, by J. R. Forrester	2-97
Castings, quality control	
Freezing Steel Under Pressure, by B. B. Gulyaev, M. P. Makel'skii and V. O. Nazarenko (<i>d</i>)	3-192
Centrifugal casting	
Centrifugal Casting of Tungsten and Molybdenum Alloys, by Russell G. Hardy, Joseph L. Gunter and Thomas A. Hamm	2-72
Ceramics	
Selection and Fabrication of Ceramics and Intermetallics, by John D. Latva	4-139
Selection and Fabrication of Nonmetallics—Oxides, Beryllides and Silicides, by John D. Latva	5-97
Chromium, plating	
How to Take Advantage of . . . Duplex Nickel Plating in Finishing With Bright Chromium, by William H. Safranek	4-109
Ultrasound Induces Flaking of Ceramics from Metals, by Joseph W. Pitts (<i>c</i>)	2-114
Coatings	
Thin, Silicone Coating Prevents Corrosion of Metals (<i>tn</i>)	2-9
Cobalt alloys	
Investment Castings for Advanced Aircraft, by R. J. Wilcox and R. W. Martini	3-90
WI-52, Co-Cr-W Alloy, by F. R. Morral and H. J. Wagner (<i>d</i>)	2-144
Columbium	
Columbium in High-Temperature Alloys, by F. G. Haynes (<i>d</i>)	3-188
What Columbium Does to Carbon Steel, by F. E. Van Voris	2-84
Columbium alloys	
Columbium Alloy Gains in Aerospace Industry (<i>tn</i>)	6-10
New Processing Method Improves Columbium-Tin Wire (<i>tn</i>)	3-9
Composite materials	
Materials Progress in Composites (<i>tn</i>)	1-10
Compression tests	
Compression Blocks Solve Gearing Problems, by Russell Hoffman and Lynn E. Arnold	6-79
Controlled atmospheres	
Controlling Furnace Atmosphere by Infrared Analysis, by J. H. Flood	5-76
Copper	
Selection of Materials for Automotive Applications, by J. R. Forrester	2-97
Corrosion	
How Molten Alkali Metals Affect Other Metals and Alloys, by A. F. Amateau (<i>d</i>)	3-153
Corrosion, intergranular	
How Sensitization Affects the Corrosion of Stainless Weld Metal, by Russell B. Gunia and Thomas J. Moore (<i>ds</i>)	5-96B
Sensitization of Stainless Weld Metal, by Russell B. Gunia and Thomas J. Moore	5-96
Corrosion tests	
What Metallurgical Engineering Can Do for Management, by Robert F. Thompson and George H. Robinson	3-66

(aa) Atomic Age; (br) Book Review; (c) Correspondence; (cp) Critical Points; (d) Digest;

(ds) Data Sheet; (lm) Light Metallurgy; (sr) Short Runs; (tn) Technical News

Cracks	
Hydrogen Cracking and Residual Stress, by Kichi Masubuchi and D. C. Martin (d)	3-182
Degassing	
Degassing Liquid Steel, by H. Thielmann and Herman Maas (d)	2-150
Die casting	
A Look at Steels for Die Casting Dies, by Charles R. Wendell	5-70
Heat Treating Steels for Die Casting Dies, by Charles R. Wendell	6-108
Molybdenum Alloy Shows Long Die-Casting Life (tn)	2-7
Dip coating	
Tinning Small Parts, by C. J. Thwaites (d)	2-169
Distortion	
Heat Treating Large Parts to Close Tolerances, by Jack D. Robinson and John C. Weis, Jr.	4-96
Drawing	
Evaluating Drawability of Sheet Steel, by R. S. Burns and R. H. Heyer (d)	5-174
Drawing, press forming	
Forming Auto Parts of Galvanized Steel, by Paul G. Nelson	4-104
Electric arc steelmaking	
How Melting Techniques Can Affect Fatigue Strength, by R. W. Steur	5-92
Melting Alloys by the Hopkins Process, by W. A. McKeen, L. G. Joseph and D. M. Spehar	3-85
Electrophoretic plating	
New British Process for Coating Steel Strip With Aluminum, by Tom Bishop	1-97
Electroplating	
Baking Hydrogen From Chromium-Plated Steel, by Donald E. Wallschlaeger and Merrill A. Schell	1-84
How Part Configuration Affects Plating of Zinc Die Castings, by Fred L. Siegrist (d)	5-138
Extrusion	
Extruding Aluminum Sheaths on Cables, by Fred F. Polizzano	1-80
Extrusion, cold	
Cold Extrusion of Steels . . . Its Promises and Problems, by Carl Weymuller	4-66
Designing for Cold Extrusion, by Alfred Braun	4-78
What We Can Learn From . . . Cold Extrusion in Europe, by Heinz D. Feldmann	4-83
Fatigue	
How Melting Techniques Can Affect Fatigue Strength, by R. W. Steur	5-92
Strain Aging and Fatigue Limit, by J. C. Levy and S. L. Kanitkar (d)	1-160
Finishing	
Pattern Printing on Steel Strip, by Tom Bishop (sr)	3-112
The Role of Oxide and Replacement Coatings in Metal Finishing, Part 2—Nonferrous Alloys, by Lawrence J. Durney	1-73
Flaw detection	
A Standard for Eddy Current Tests, by Howard J. Bowman	1-78
Flaw detection, magnetic particles	
Locating Seams in Billets Automatically (sr)	5-111
Flaw detection, radiographic	
Fundamentals of Fluoroscopy, by Walter R. Hampe	2-88
Fluid bed process	
Fluidized Bed for Investment Molds (tn)	1-10
Forging, high-energy-rate	
Forging Molybdenum by High-Energy-Rate Method, by Alfred H. Petersen and Fred C. Pipher	2-78
Forging, rotary	
Automatic Rotary Forging of Stepped Shafts, by H. F. Carlson	4-121
Forgings	
17-4 PH Forging Used in Compressor Rotor (tn)	2-9
Forming	
Forming With Magnetic Pulses, by D. F. Brower (d)	3-136
Foundry practice	
Ductile Iron Castings in Farm Equipment, by Albert H. Rauch and Eric Welander	4-52
Problems in Designing Castings With Thin Sections	5-84
Fracture	
Fractures in Castings, by J. A. Wright and A. G. Quarrell (d)	3-164
Inspecting Fractures: What We Can Learn From Metal Failures, by Robert C. Bates	4-114
Selection and Fabrication of Ceramics and Intermetallics, by John D. Latva	4-139
Furnace, plasma arc	
Plasma Arc Furnaces Produce Vacuum Quality Melts (tn)	5-7
Galvanized steel pipe	
Welding Galvanized Corrugated Pipe, by Robert Gasser	1-90
Gas analysis	
Controlling Furnace Atmospheres by Infrared Analysis, by J. H. Flood	5-76
Gears	
Compression Blocks Solve Gearing Problems, by Russell Hoffman and Lynn E. Arnold	6-79
Surface Failures in Gear Teeth (d)	6-172
Ghosts	
Elephant Hunt, by Herbert Fischler (c)	3-114
Halloween Scene, by Carl C. Smith (c)	4-146
Heart of Steel, by Norman Adsit and John Mortenson (c)	3-114
Metal Termites Leaves Footprint, by F. D. Lemkey and W. J. Hermann (c)	6-117A
Government agencies	
Four Government Agencies Get Together (tn)	1-8
Grain boundaries	
Grain Size and Yield Points, by T. L. Russell, D. S. Wood and D. S. Clark (d)	3-174
Graphite	
The New Graphites . . . Versatile Engineering Materials, by C. E. Ford, R. M. Bushong and R. C. Stroup	6-101
Grinding	
Grinding Submicron Metal Powders, by Max Quatinetz, Robert J. Schafer and Charles R. Smeal (d)	2-160
Grinding Tool Steels, by V. A. Landa (d)	2-171
Guns	
An Ultrahigh-Strength Steel for Ordnance, by C. M. Carman, D. F. Armento and H. Markus	1-86
Hardening	
Impregnating Steels with Boron, by V. D. Taras and L. V. Skoogrova (d)	2-166
Truck Axle Shafts Hardened Without Warping (tn)	2-7
Hardening, dispersion	
A Dispersion-Strengthened Nickel Alloy, by Fred J. Anders, Jr., Guy B. Alexander and William S. Warfel	6-88
New Vistas in Materials	2-105
Hardening, induction	
Fast Induction Line for Steel Bars Reduces Reprocessing Time (tn)	4-9
Induction Hardening System Improves Crankshafts (tn)	6-7
Heading, cold	
Cold Heading Stainless and Specialty Steels, by S. E. Tyson and J. W. Keegan	4-87; (c) 6-117A
Heat-resisting alloys	
Cast and Wrought Microstructures of Ni55 at Elevated Temperatures, by L. Dillinger, R. D. Buchheit and D. C. Ludwigson (ds)	1-96B
Columbium in High-Temperature Alloys, by F. G. Haynes (d)	3-188
Melting Alloys by the Hopkins Process, by W. A. McKeen, L. G. Joseph and D. M. Spehar	3-86
Microstructures of Ni55, by L. Dillinger, R. D. Buchheit and D. C. Ludwigson	1-96
NASA Program Screens Alloys for Mach-3 Transport (tn)	2-8
New Vistas in Materials	2-105
Semicontinuous Vacuum System Casts Superalloy Parts (tn)	5-8
What Metallurgical Engineering Can Do for Management , by Robert F. Thompson and George H. Robinson	3-66
WI-52, a Co-Cr-W Alloy, by F. R. Morral and H. J. Wagner (d)	2-144
Heat-resisting materials	
Advanced Propulsion Systems Challenge Today's Materials	2-106
High-Temperature Materials for Nuclear Applications—I, by J. F. Schuman and M. T. Simnad (d)	6-147A
Nuclear Rockets and Ramjets Challenge Today's Materials	3-105
Heat-resistant steel	
Cold Heating Stainless and Specialty Steels, by S. E. Tyson and J. W. Keegan	4-87; (c) 6-117A
Heat treatment	
Brazing and Hardening Stainless Steels in Vacuum, by Richard P. Korff	5-93
British Study New Method for Annealing Strip, by Tom Bishop	2-93
Controlling Furnace Atmospheres by Infrared Analysis, by J. H. Flood	5-76
Engineering Properties of Asformed Steels, by William M. Justuson and Victor F. Zackay	6-111
Heat Treating Large Parts to Close Tolerances, by Jack D. Robinson and John C. Weis, Jr.	4-96
Heat Treating Steels for Die Casting Dies, by Charles R. Wendell	6-108
High-strength steel	
An Ultrahigh-Strength Steel for Ordnance, by C. M. Carman, D. F. Armento and H. Markus	1-86
New Ultrahigh-Strength Steels . . . the Maraging Grades, by Daniel H. Yates and John C. Hamaker, Jr.	3-87
What the Explosive Test Reveals About Behavior of High-Strength Steel, by Alan J. Block and Daniel A. Schaltberger	1-89
Hydrogen	
Hydrogen Cracking and Residual Stress, by Kichi Masubuchi and D. C. Martin (d)	3-182
Hydrogen in steel	
Baking Hydrogen From Chromium-Plated Steel, by Donald E. Wallschlaeger and Merrill A. Schell	1-84
New Test for Hydrogen Embrittlement, by F. S. Williams, W. Beck and E. J. Jankowsky (d)	1-154
Impact properties and tests	
How Impact Resistant Is Malleable Iron? by W. K. Bock and Hans J. Heine	5-33
Intermetallics	
Selection and Fabrication of Ceramics and Intermetallics, by John D. Latva	4-139
Selection and Fabrication of Nonmetallics—Oxides, Beryllides and Silicides, by John D. Latva	5-97
Iron	
A New Reagent for Etching Iron and Steel, by L. G. Salten (sr)	2-111
Iron and steelmaking, Kaldo process	
Stora-Kaldo Furnaces Near Completion (tn)	8-9
Iron and steelmaking, oxygen furnace processes	
Refractories for Oxygen Steelmaking	2-101
Isotopes	
Rapid Oxygen Analysis for Steel (tn)	1-8
Joining	
Joining Refractory Metals by Thermomechanical Means (tn)	1-10
Laser	
The Laser . . . a Metallurgical Tool of Tomorrow, by R. D. Engquist	5-67
Lead alloys	
Inurities in Lead-Tin Alloys, by Max F. W. Heberlein (d)	5-176
Light metallurgy	
The Story of Cafeteria Institute of Technology, by Walter G. Patton (tm)	3-101
Low-temperature alloys	
A Titanium Alloy at Low Temperature, by Morgan P. Hanson and Hadley T. Richards (d)	3-144
Low-temperature applications	
Cast Stainless at Subzero Temperatures, by E. R. Hall (d)	5-189

Stainless steel	
AM-367 . . . A New Precipitation-Hardening Stainless Steel, by Charles M. Hammond	6-92
Brazing and Hardening Stainless Steels in Vacuum, by Richard P. Korf	5-80
Cast Stainless at Subzero Temperatures, by E. R. Hall (d)	5-169
Cold Heading Stainless and Specialty Steels, by S. E. Tyson and J. W. Keegan	4-97; (e) 6-117A
Columbium Addition Upgrades Type 410 Stainless (tm)	8-8
Determining Practical Impurity Levels for Reactor Steels, by D. D. Foley, G. P. Fancer and J. L. Zegger (d)	2-164
Engineering Properties of Ausformed Steels, by William M. Justusson and Victor F. Zackay	6-111
How Sensitization Affects the Corrosion of Stainless Weld Metal, by Russell B. Gunis and Thomas J. Moore (ds)	5-96B
Melting Alloys by the Hopkins Process, by W. A. McKeen, L. G. Joseph and D. M. Sephar	3-86
Properties of a Cast Stainless, by R. J. Mangone and A. M. Hall (d)	2-173
Razors of Stainless Steel (sr)	6-116
Rolling Stainless Steel at Subzero Temperatures, by Charles R. Mayne (d)	6-186
Sensitization of Stainless Weld Metal, by Russell B. Gunis and Thomas J. Moore	5-96
Stainless Steel Investment Cast Without Pitting (tn)	8-7
Stainless Steels Vary in Resistance to Stress Corrosion, by P. P. Snowden (d)	1-133A
Stress Corrosion of Stainless Steel, by P. P. Snowden (d)	5-156
Untempered Martensite Affects Stress Corrosion of Type 410 Stainless, by Henry Suss	5-89
Vacuum Brazing of Stainless Steel to Beryllium, by Everette M. Whitson	1-93
Stainless steel, forging	
Automatic Rotary Forging of Stepped Shafts, by H. F. Carlson	4-121
Steel	
Baking Hydrogen From Chromium-Plated Steel, by Donald E. Wallschaefer and Merrill A. Scheil	1-84
Compression Blocks Solve Gearing Problems, by Russell Hoffman and Lynn E. Arnold	6-79
Degassing Liquid Steel, by H. Thiedemann and Herman Maas (d)	2-150
Cold Setting of Springs, by H. J. Elmendorf	2-95
Evaluating Drawability of Sheet Steel, by R. S. Burns and R. H. Heyer (d)	5-174
Free-Machining Steels . . . Two New Developments (tn)	3-7
How Melting Techniques Can Affect Fatigue Strength, by R. W. Steur	5-92
How Tellurium Affects Machinability of Steel, by R. C. Spencer, C. D. Nagell and Robert Richmond	6-73
How to Prevent Weld Cracking in Steel Structures, by L. J. Privoznik	6-83
Impregnating Steels With Boron, by V. D. Taran and L. V. Skoogrova (d)	2-166
Locating Seams in Billets Automatically (sr)	5-111
Materials for Rocket Engines, by R. P. Frohberg (d)	1-156
A New Reagent for Etching Iron and Steel, by L. G. Salden (sr)	2-111
Pattern Printing on Steel Strip, by Tom Bishop (sr)	3-112
Preparing Steels for Transmission Electron Microscopy, by Albert Szirmai	5-94
Properties of Basic Oxygen Steels, by W. C. Kimball (e)	1-114
Rapid Oxygen Analysis for Steel (tn)	1-8
The Relation of Design Stresses to Wire Diameter in Cold Setting of Springs, by H. J. Elmendorf (d)	2-96B; 3-96B
Selection of Steels for Economy in Manufacture, by Stuart M. Hansen	3-74
Semicontinuous Casting of Steel Ingots, by R. D. Whetstone (e)	5-120
Steel Companies Merge Research Efforts (tn)	3-8
Steels at Cryogenic Temperatures, by J. C. Campbell and L. P. Rice (d)	3-186
Welding High-Impact Steels, by R. A. Kubli and W. B. Sharav (d)	3-185
Steel, aluminized	
New British Process for Coating Steel Strip With Aluminum, by Tom Bishop	1-97
Steel, annealing	
British Study New Method for Annealing Strip, by Tom Bishop	2-93
Steel, decarburization	
How Silicon Affects Decarburization of Steel, by V. K. Chandok	2-82
Steel, electroplating	
How to Take Advantage of . . . Duplex Nickel Plating in Finishing With Bright Chromium, by William H. Safranek	4-109
Steel, extrusion, cold	
Cold Extrusion of Steels . . . Its Promises and Problems, by Carl R. Weymueller	4-66
Designing for Cold Extrusion, by Alfred Braun	4-78
What We Can Learn From . . . Cold Extrusion in Europe, by Heinz D. Feldmann	4-83
Steel, galvanized	
Forming Auto Parts of Galvanized Steel, by Paul G. Nelson	4-104
Steel, leaded	
How Leaded and Nonleaded Steels Compare, by William Simon (d)	1-166
Steel, maraging	
How to Weld . . . Heat Treat . . . Forge Machine . . . 18% Ni Maraging Steel, by A. R. Potenski	4-100
New Ultrahigh-Strength Steels . . . the Maraging Grades, by Daniel H. Yates and John C. Hamaker, Jr.	3-97
A User Evaluates Maraging Steels, by H. R. Smith, R. E. Anderson and J. T. Bingham	5-103
Steel, notch strength	
How Carbon Can Affect Notch Strength, by E. P. Klier (d)	1-134
Steels, strengthening	
Look for Other Ways, by Elliot S. Nachman (ep)	1-65
Steel castings	
Freezing Steel Under Pressure, by B. B. Gulyaev, M. F. Makel'skii and V. O. Nazarenko (d)	3-192
Strain aging	
Strain Aging and Fatigue Limit, by J. C. Levy and S. L. Kanitkar (d)	1-160
Stress	
Relaxation of Inconel, by C. R. Kennedy and D. A. Douglas (d)	2-156
Stress corrosion	
Stainless Steels Vary in Resistance to Stress Corrosion, by P. P. Snowden (d)	1-133A
Stress Corrosion of Stainless Steel, by P. P. Snowden (d)	5-156
Untempered Martensite Affects Stress Corrosion of Type 410 Stainless, by Henry Suss	5-89
Stresses	
Residual Stresses and Abrasive Blasting, by H. J. Noble (d)	2-168
Tellurium	
How Tellurium Affects Machinability of Steel, by R. C. Spencer, C. D. Nagell and Robert Richmond	6-73
Testing	
What Metallurgical Engineering Can Do for Management, by Robert F. Thompson and George H. Robinson	3-66
Testing, explosive	
What the Explosive Test Reveals About Behavior of High-Strength Steel, by Alan J. Block and Daniel A. Schaitberger	1-69
Tin plate	
Tinning Small Parts, by C. J. Thwaites (d)	2-169
Titanium	
Titanium Finds New Uses in Petrochemical Industry (tn)	3-9
Titanium alloys	
A Titanium Alloy at Low Temperature, by Morgan P. Hanson and Hadley T. Richards (d)	3-144
Tool steel	
Grinding Tool Steels, by V. A. Lands (d)	2-171
Heat Treating Steels for Die Casting Dies, by Charles R. Wendell	6-108
How Carbon Affects a 5% Chromium Tool Steel, by John C. Hamaker, Jr. and Eugene J. Vater (d)	2-188
Zinc alloys	
Selection of Aluminum, Magnesium and Zinc Alloys, by Robert Metzger	3-78
Zinc die castings	
How Design Affects Plating of Zinc Die Castings (tn)	3-8
How Part Configuration Affects Plating of Zinc Die Castings, by Fred L. Siegrist (d)	5-188
Zinc die castings, electroplating	
How to Take Advantage of . . . Duplex Nickel Plating in Finishing With Bright Chromium, by William H. Safranek	4-109
